

SHAREERA RACHANA

Department of ShareeraRachana a basic subject, dealing with the intricate details of human body. Knowledge of human anatomy is imparted through human cadavers dissection. Dissection not only teaches the structures of the body but also makes us aware of many other physiological aspects of ShariraRachana, which are described by the Acharyas.

The department has well qualified staff for conducting the theory and practical classes for 1st year BAMS and along with well maintained departmental library, more than 117 specimen, 78 charts and 35 models. Every year BAMS students will dissect 04 bodies.

Recently PG has been applied in this department.
